# Cheat Your Way Through, the game

You play as a student, trying to pass a test you didn't study for. Your goal is to copy from another student while the teacher isn't looking and try to complete the test before the time runs out!

You play as Triangle Head, a known cheater. The teacher is keeping an eye on you. You have a time limit for your exam, and a progress bar at the top of the screen, which tells you how much of the test you've successfully copied.

Once the teacher is not looking your way, you can hold down left click to copy from the Blockhead behind you! This fills your progress bar. However, if you copy while the teacher is looking at you, you lose, which you will be notified of via a popup.

The teacher has visual clues which will signal to you that they're about to either start or stop looking at you, so you have to pay attention to them while you are cheating so that you don't get caught!

The game ends when you run out of time or when you finish the exam. When the time runs out, the bell will ring. A nice touch would be to display the grade you received after the game ends, which will depend on how much you filled up the bar.
